TABLE NOTES

- A. Front yard for buildings on West Main Street and Salem Turnpike. For properties located on the southerly and northerly sides of West Main Street and Salem Turnpike, between the west channel of the Yantic River and the easterly right-of-way line of the Connecticut Turnpike: No building or structure shall hereafter be extended, erected or reconstructed with a front yard less than the required zone setback for front yards within the proposed right-of-way shown on the State of Connecticut department of transportation map of Route 82 reconstruction, supplemental to the maps mentioned in section 8.2, and which supplemental map is made part of this section as fully as if set out herein.
- B. In the GC (general commercial) district, 1 side yard of each lot may be omitted and buildings may be built to the common lot line, provided the party or other walls separating them are of masonry construction and without openings.
- C. Coverage may be expanded to a maximum of 70 percent if permanent public access to and along a waterfront in the form of an easement at least 10 feet wide is provided, and if such increase in lot coverage does not adversely affect the coastal resources as defined by CGS § 22a-93(7).
- D. Building height requirements may be waived provided the Commission is furnished with a favorable report by the Fire Marshal of the City of Norwich setting forth the firefighting feasibility of the proposed building.
- E. Any lot existing in a PC zone as of September 29, 2003, may be developed and built upon provided it meets the bulk requirements of a GC zone.
- F. Any lot in excess of 10 acres, maximum lot coverage may be increased to 40 percent.
- G. Vehicular access from Maple Street. In the area bounded by West Main Street, Crane Avenue, Maple Street and Asylum Street, no vehicular access to or from Maple Street shall be permitted to any building or lot.
- H. Display of goods. In all commercial districts no goods, wares, or merchandise shall be displayed in the front yard setback.
- I. The Commission may permit lesser acreage with the provision that parcels are part of a planned subdivision and the total acreage for the entire area calculates to equal the number of lots multiplied by three (number of acres required per lot). The intent of the regulation is to afford the opportunity to develop areas that are more suitable for development as open space and to create a campus atmosphere as part of the project.
- J. The Commission may permit interior lots with no frontage on a street provided a dedicated easement for access is provided from an adjacent parcel using a shared driveway.
- K. The Commission may permit encroachment of the building into the minimum yard setback if the relocation necessary to preserve scenic views.
