About Rexco Industrial Park

Located in the municipality of Guaynabo, Puerto Rico, Rexco Industrial Park offers a prime commercial opportunity for businesses looking for a strategic location. The property spans over 18.4 acres and comprises nine buildings totaling 391,533 square feet of space. With easy access to major roads including Road #165, Road #24, De Diego Expressway (Road 22), and Interstate PR-2, Rexco Industrial Park provides exceptional ingress and egress points, making it convenient for both tenants and customers. Additionally, the property benefits from its B-1 zoning classification, allowing for a wide range of commercial activities. Its flood zone X designation ensures a secure and resilient environment for businesses.

Rexco Industrial Park offers ample parking with a total of 488 automobile spaces, providing a ratio of 1.25 per 1,000 square feet. Should additional parking be required, the property also features a vacant land site that can accommodate extra vehicles. The buildings within the park boast modern infrastructure, including cooling equipment

such as packaged rooftop units, split systems, and air handlers, ensuring a comfortable working environment. Moreover, the property is equipped with a wet-type fire sprinkler system in the Central Warehouse and Annex 3 buildings, as well as an emergency booster pump and fire hydrants on-site. With reliable service providers for electricity, water/ sewer, and communications, Rexco Industrial Park is ready to support the needs of businesses looking to thrive in the heart of Puerto Rico.

Amenities

Rexco Industrial Park offers a range of amenities to support businesses and enhance the working environment. The property features two points of ingress/egress for convenient access, along with ample parking for employees and visitors. Additionally, the park includes nine buildings totaling 391,533 square feet of space, providing flexibility for various business needs. The HVAC system ensures comfortable working conditions, while the wet-type fire sprinkler system and fire hydrants enhance safety measures. Furthermore, the park benefits from exterior lighting fixtures and reliable service providers such as the Puerto Rico Electric Authority, Puerto Rico Water & Sewer Authority, and Claro/AT&T for electricity, water/sewer, and communications respectively. Finally, the presence of redundant power generators with aboveground storage tanks adds an extra layer of reliability for uninterrupted operations.
