Closest locations 1-28, Table 1 of 2

Data Note: The Traffic Profile displays up to 30 of the closest available traffic counts within the largest radius around your site. The years of the counts in the database range from 2025 to 2000. Esri removes counts that are older than 2000 from the Kalibrate provided database. Traffic counts are identified by the street on which they were recorded, along with the distance and direction to the closest cross-street. Distances displayed as 0.00 miles (due to rounding), are closest to the site. A traffic count is defined as the two-way Average Daily Traffic (ADT) that passes that location.

Dist (mi)	Street	Nearest Cross Steet	Year of Count	Traffic Count
0.90	N River Road	Oak Ave	2022	1,200
1.00	East Cowboy Way	South Elm Street	2024	11,000
